

Triple R AL200 Filter System

Triple R offline / bypass oil filtration system

Article number(s): AL200 / TR-121048

- Purification, drying and conditioning of fuel and all hydraulic and lubricating fluids
- Installation on hydraulic systems with own pump – Minimum pressure 2.0 bar ~ up to 6 bar [0.6mpa] peak
- Designed and produced by TRIS BV

PRODUCT DESCRIPTION

The AL200 is connected as a bypass deep filter to an existing system or machine containing a pump. Using the available pressure, up to 6 bar, the filter provides highly effective purification of all dirt particles, moisture, and oxidation products (resins). Contamination that is usually impossible or ineffective to remove with standard filters, yet can severely contaminate an oil system. Combined with the M100 or D100 filter element, it's possible to achieve a clean system and continuous cleanliness of NAS 4 | ISO 15/13/10 or better! Triple R's AL series is versatile and widely applicable. It will purify fuel and permanently protect a machine or drive system from failures or repairs caused by hard or soft contamination or water.
