- Installation on tanks or systems that are not under pressure or do not contain a pump
- Design very suitable for mounting against a wall, machine or tank wall
- Also available: Marine/Offshore, Fuel, ATEX, Lubrication system, Fluid sensors & Remote connection
- Designed and produced by TRIS BV

PRODUCT DESCRIPTION

The SE100 WH is specifically designed for filtering hydraulic oil and is connected to the system as a bypass system. Thanks to its self-priming motor-pump combination, the unit operates completely independently of the main process. The system effectively removes contaminants, moisture, and oxidation products (resins) – particles that standard filters typically cannot remove. Combined with an M100 or D100 filter element, an oil purity of NAS 4 | ISO 15/13/10 or better can be achieved.
