

Triple R E300 H57 Filter Element

Triple R depth filter element

Article number(s): EL30011 / E-300 TR-20505

PRODUCT DESCRIPTION

Triple R filter elements are manufactured in Japan. A highly precise production process and strict inspections ensure that every filter element meets the specified requirements. Due to their unique and patented composition, Triple R filter elements are the only ones capable of preventing (solid) particles, water, AND the formation of resin. E-Series filter elements are primarily used as the first filter element in hydraulic systems or for use in (combustion) engines. E-Series = 5 µm absolute | β5 = 1000

TECHNICAL SPECIFICATIONS

Size	Ø303 x H57 mm	Material	Engineered cellulose
Filtration	5 µm absolute β5 = 1000	Weight	1.6
Liquid	Hydraulic oil, Engine oil, Fuel, Other	Print color	Blue
Max. temperature (°C)	100 (theoretical)	HScode	4823.20-000 1
Country of origin	Japan		

COMPATIBLE TRIPLE R SYSTEM FAMILIES

Compatible products are grouped by system family to keep the datasheet compact.

EUROPEAN DISTRIBUTION & TECHNICAL SUPPORT

Triple R Oil Cleaner | TRIS B.V.

European importer & distributor - Engineering - Assembly - Technical support
Topaasstraat 5, 7554 TJ Hengelo, The Netherlands | +31 74 242 8109
