PRODUCT DESCRIPTION

The SE100 BH is specifically designed for filtering hydraulic oil and is connected to the system as a bypass system. Thanks to its self-priming motor-pump combination, the unit operates completely independently of the main process. The system effectively removes contaminants, moisture, and oxidation products (resins) – particles that standard filters typically cannot eliminate. Combined with an M100 or D100 filter element, an oil purity of NAS 4 | ISO 15/13/10 or better can be achieved.
